

MULTILINE

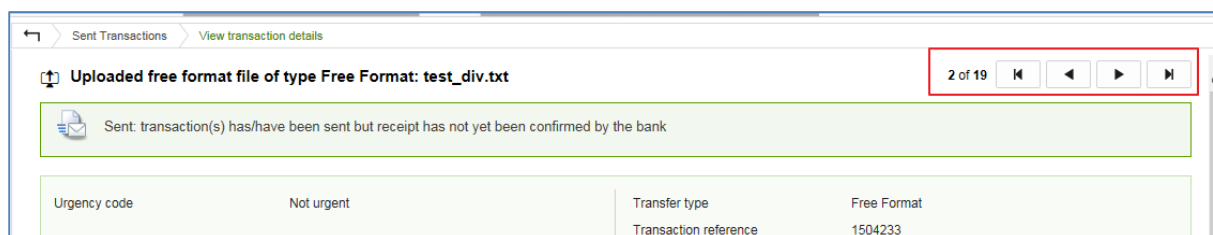

New improvements in MultiLine V2.26

- 1. Smoother navigation in transactions 1
- 2. Icon for uploaded payment files 2
- 3. New column Hash code in txt reports 2

1. Smoother navigation in transactions

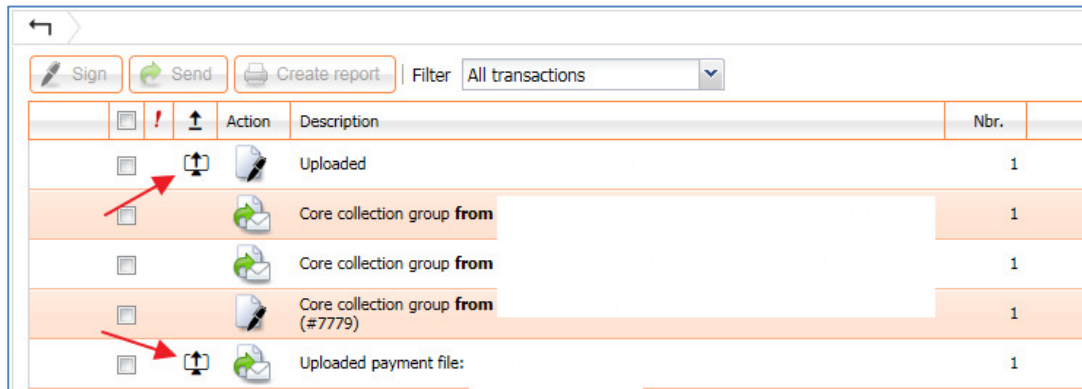

Four extra arrow buttons have been added so that you can navigate more smoothly through your payments in “Transactions” and “Sent Transactions”: First, Previous, Next and Last.

You can also navigate smoothly through the **transactions in an envelope** in your Transactions tab. An envelope would previously close automatically once you had consulted a transaction.

2. Icon for uploaded payment files

A new icon in transactions indicates if payment files are uploaded in MultiLine.

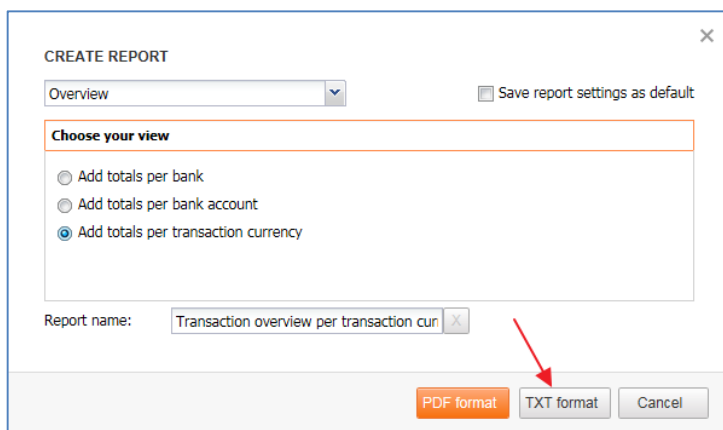

The screenshot shows a transactions overview report with the following data:

	Action	Description	Nbr.
		Uploaded	1
		Core collection group from	1
		Core collection group from	1
		Core collection group from (#7779)	1
		Uploaded payment file:	1

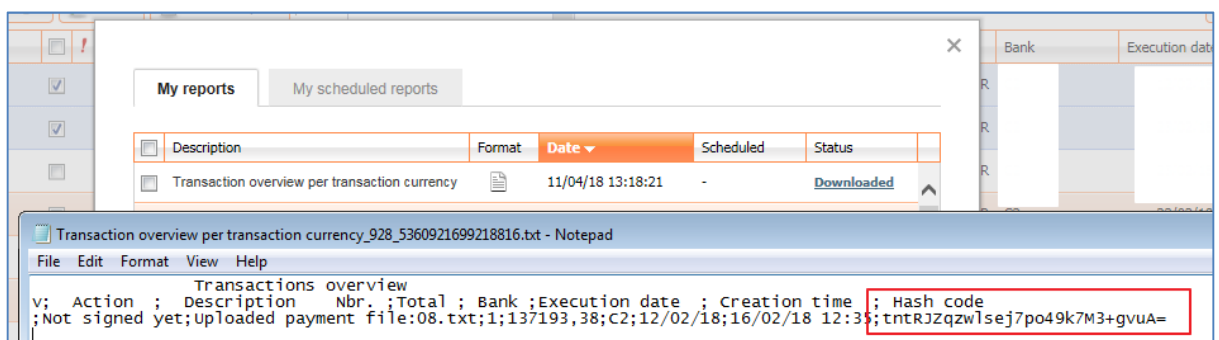

3. New column Hash code in txt reports

The transactions overview report in TXT format shows a new column with the **hash code** of uploaded files. You can use this code for checking purposes with the hash codes created in certain accounting packages that allow this feature.

The 'CREATE REPORT' dialog box shows the following options:

- Overview (selected)
- Save report settings as default (checkbox)
- Choose your view:
 - Add totals per bank
 - Add totals per bank account
 - Add totals per transaction currency (selected)
- Report name: Transaction overview per transaction cur
- Buttons: PDF format, TXT format, Cancel

The 'My reports' window shows a list of reports:

Description	Format	Date	Scheduled	Status
Transaction overview per transaction currency		11/04/18 13:18:21	-	Downloaded

The Notepad window shows the following report content:

```
Transaction overview
v: Action ; Description Nbr. ;Total ; Bank ;Execution date ; Creation time ; Hash code
;Not signed yet;Uploaded payment file:08.txt;1;137193,38;C2;12/02/18;16/02/18 12:35;tntRjZqzw1sej7po49k7M3+gvuA=
```
